Subject: **Water Board Review of Revised Supplemental Site Investigation Report  
Riley Avenue Site/Fuel Distribution System, Section BR11-1  
Presidio of San Francisco, San Francisco, California**

Dear Ms. Larssen:

I reviewed the Presidio Trust's *Revised Supplemental Site Investigation Report* (report), prepared by TRC Solutions, Inc. and dated August 2, 2019. The report characterizes soil and groundwater contamination resulting from the fuel oil release from Section BR11-1 of the former Fuel Distribution System at the subject Site. I concur with the report.

I look forward to reviewing the Feasibility Study/Corrective Action Plan (FS/CAP), which was being prepared on August 2, 2019. The FS/CAP should present the preferred Corrective Action Plan for contamination at the Site only after completion of the Feasibility Study of alternatives, using standard industry practices.

If you have a question, please contact me at (510) 622-2375 or [jeff.white@waterboards.ca.gov](mailto:jeff.white@waterboards.ca.gov).

Sincerely,

Jeffrey D. White  
Water Resource Control Engineer
